

TIA Pressure Relief Safety Valves

Important: Before using this equipment, read all safety precautions and instructions. Keep for future use.

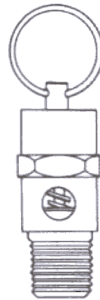

WARNING

A safety valve that does not operate properly may allow for too much pressure in a system. Component rupture or explosion could occur. The valve must be replaced. When replacing a safety valve:

- The replacement must have the same pressure rating as the safety valve being replaced.
- Relieve system pressure before removing and replacing a safety valve.

DESCRIPTION

The TIA pressure relief safety valves are standard on most equipment where a control of maximum air pressure is required. All valves are ASME constructed, National Board approved and have a resilient seat.

SPECIFICATIONS

Valve	Operating Pressure	Thread Size
TIA-4326	18 psi	1/8" NPT(M)
TIA-4355	55 psi	1/4" NPT(M)
TIA-4380	80 psi	1/4" NPT(M)
TIA-5040	40 psi	1/4" NPT(M)
TIA-5110	110 psi	1/4" NPT(M)

INSTALLATION

Use a Teflon-based pipe thread sealant or Teflon tape on the male thread prior to installation to prevent air leakage.

See **WARNING** before installing or replacing.

PREVENTIVE MAINTENANCE

Check for proper operation of the safety valve by occasionally pulling the relief ring. The valve should operate freely without sticking, and air should freely escape.

WARRANTY

This product is covered by DeVilbiss' 1 Year Limited Warranty. See SB-1-000 which is available upon request.

WORLDWIDE SALES AND SERVICE LISTING - www.devilbiss.com

DeVilbiss Automotive Refinishing

DeVilbiss has authorized distributors throughout the world. For equipment, parts and service, check the Yellow Pages under "Automobile Body Shop Equipment and Supplies". **FOR TECHNICAL ASSISTANCE, CALL TOLL FREE 1-800-445-3988 (U.S. ONLY). FOR LOCAL CALLS, SEE LISTING BELOW.**

U.S. Customer Service
MAUMEE, OH 43537

Address
1724 Indian Wood Circle
